(54) Title: TOPICAL LOTION CONTAINING OATSTRAW

(57) Abstract

A topical lotion for relief from pain, swelling and itch composed of natural ingredients is herein described. The lotion is composed of a mixture of an oatstraw concentrate and glycerine. The lotion is used to treat a variety of skin conditions as well as injuries such as herniated discs, muscle, tendon and ligament pulls and tears. Furthermore, topical application of the lotion to the scalp has been shown to stop hair loss in some instances and in fact promote hair growth. The lotion can also be applied to the soles of the feet as a way of inducing a deeper and more restful sleep in an individual.
